

Assignment 2 of CS-3715

Due on February 5, 2007

Note The assignment must be submitted before 9am, Monday, February 5th in the CS3715 class. The assignment must contain a cover page with the course name, and your student number. Late assignments will not be accepted. For the programming part, source code must be submitted on paper, and with submit-assignment. Source code should be commented in a reasonably informative manner, but not required to be in the javadoc format. For the written part, only hard copy needs to be submitted.

Written Part (5 marks)

- Compare the GET and POST methods of HTTP.

Programming Part (15 marks)

- “Your Resume”

Construct a personal resume in HTML. Use CSS (*not* the deprecated `font` element to format the text (face, size, color). In addition, use tables (with or without borders) and lists to organize the materials. Try to separate presentation from contents by applying CSS styles. All styles must be placed in a separate style file. (You can use fake data if you do not wish to disclose private information.)
