

# MUN Computer Science Society

## Meeting Minutes

June 13th, 2020

### Attendance

- Marty Whelan
- Jack Harrhy
- Ethan Crann
- Andrew Stacey
- Kent Barter

### Agenda Topics

#### Organized Resources/Website Rebuild

- The plan is to rebuild our website
- Probably Gatsby instead of what's being used currently
- GraphQL wrapper around the minutes/other things?
- Resources:
  - Much more fleshed out than Discord can offer
  - Try and organize such that students can post resources themselves
    - \* Would be nice if it had a git-style interface
    - \* Need to ensure copyrighted content doesn't stay up though
  - Would likely start with an internal use stage within the executives to populate with some starting resources
- Key objectives for a rebuild:
  - Maintain the archive
  - Make the interface prettier/more easily accessible
- Jack will start on a Gatsby project, details to follow in next Saturdays meeting

#### Other Resources

- Would live in the resources page
- Things like video tutorials could be posted here and integrated into the website
