MUN Computer Science Society

Meeting Minutes

January 10, 2020

Attendance

- Madison Emshey
- Dylan Brine
- Ethan Crann
- Zach Smith
- David Chicas
- Zac Batten
- Vilakshan Khanna
- Jack Harrhy
- Yee Teing Lo (Lola)

Agenda Topics

Xonotic

- Wednesday January 13th, 7:00pm
- No poster, but Jack will make after this meeting
- Jack will message Elliot to try and get out on socials
- try and get advertisements out tonight

Discord Plug

- Dylan will send out email tonight to all profs trying to get them to advertise our server

Minecraft Server

- server was down, is now running again
- Jack still needs to get paid for the server
- Actionable item: Jack will email Regina to see about getting our mail to get a chequebook

Discord Bot

- Will inquire to see if Riley wants to help out
- We should set up a tentative deadline, early February perhaps?

Challenge Set

- Lack of participation, need to figure out how to get better involvement before posting next set
- Set up a concrete prize pool to maybe get better participation?
- Maybe same format as before with better advertisement? And if not on next one then re-evalute
- Tentative posting of next set on Wednesday/Thursday of this week

Skating Event

- Loop is too logistically complicated, so not going to happen
- Renting a rink is still an option, may need to group up with another society or two
- Will be a lot of effort, may not be worth it?
- May let this die

Snowshoeing

- This may be a more feasible option
- http://pippypark.com/winter-fun.asp
- Need to wait until it actually snows then we can discuss it more

Other Potential Winter Activities

- Sledding?
  - Easier to organize, just show up at a hill.
  - Need to wait on snow for this as well
  - Could grab some crazy carpets, bring some hot chocolate

MUN Subreddit

- Jack has started to moderate it more heavily
- Server mostly ppl asking about MUN rather than people at MUN
- If there is anyone wanting to help mod, let Jack now
- Need to revitalize, try and get other societies on board to post and advertise
- We should post our events on there as well
- Should we sticky other society socials etc to have all information unified?

HackFrost NL

- Website will be up soon

- Once it is updated, will begin promoting and advertising
- CS Society will promote the event once we have it ready
- In class promotions?
    - Volunteers will go into synchronous lectures and give 2 min blurb
