- Dylan Brine
- Ethan Crann
- Jack Harrhy
- Madisom Emshey
- Mathew Emshey
- Vilakshan Khanna
- Zac Batten
- David Chicas
- Elliot Barnes
- Abhijeet Singh

Agenda Topics

Xanotic Event (13th)

- Last event went well.
- We will run another one. Thursday Jan 28th, 7:00-8:30.
- Action: Jack will make a poster and announce the event.

Discord presence

- We are now at 780 members.
- Email blast sent out to all profs seemed to have been quite successful in getting new members.

Challenge Set

- No new updates as of now. We will leave it on the backburner for now.

Minecraft building competition

- Something similar to this: https://forum.minetest.net/viewtopic.php?t=19915

- We can run it as a one-off to see interest.
- Can pick a theme for the builds
- Take screenshots, have the disc community vote via reactions
- Could have prizes for the best voted builds.
- Could decide theme off a community vote.
- Action: Jack will get the server set up, and then we can go post voting for the theme and go from there.

Winter Activities

- Skating + Snowshoeing is logistically difficult
- Sledding seems to be the move.
- Wait to see long-term forecast so that we can have a good day. Will just announce it when we know snow is coming.
- Action: Elliot will make a poster for sledding

Subreddit

- David & Mathew are added as moderators
- Subreddit is cleaned up now, front page has actual relevant content.

HackFrost NL

- Most prep is done, "in the final crunch"
- Advertising will begin soon for the event
- Occuring Feb 19-21.

Discord Workshop

- Let's wait till after Hackfrost to run it.
